

Dicing Services

Heatron has diced our own thick film circuits for years. Put our saws to work for you. Our fleet of **ADT 7200 series** dicers can easily handle the accuracy your application requires.

We are proud to perform our dicing in the US. Our services are provided in our Erie, PA facility. Your intellectual property is safe with us.

No job is too big or small; our flex factory schedule allows us to easily scale from a single shift to 24/7 operation.

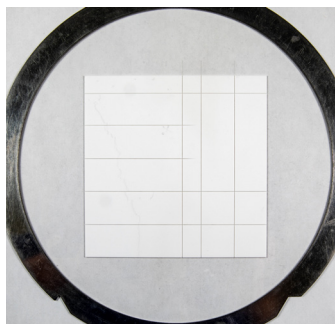

Our world class manufacturing facilities are audited nearly once per week to ensure best practices.

- Safety: UL/CSA/TUV/Intertek
- ISO 9001:2015 Quality System
- ISO 14001 Environmental

Dicing Capabilities:

- 200mm maximum diameter
- Silicon substrates
- Alumina (Al_2O_3) substrates
- Aluminum Nitride (AlN) substrates
